DATO SSD installation guide_Desktop

Step 1: Before the installation commences, be sure to shut down your computer system and disconnect the power cord.

Step 2: Remove the computer case locate and identify the SATA connectors of your system. Refer to your computer's manual for information on how to remove the existing hard drive.

Step3: SATA cables of the motherboard should be connected to the SATA data and power connectors on the SSD. Please be aware that the L-shaped SATA connector can only fit in one direction. Before pressing them into position, be sure to align the SATA plug and SSD connectors properly

Step 4: The SSD can securely mounted with the screws provided.

Step 5: After the installation is completed, restore the case of the original position and reconnect the power.

Step 6: Turn on the computer to verify the installation.

Step 7: Configure the BIOS and partition the drive.

A. Power on your computer system normally and follow the on-screen instruction during boot-up to proceed into the BIOS or CMOS configuration menu.

B. Select the Auto function in the BIOS/CMOS menu, that represents the SSD. This will allow your system to auto-detect the disk.

C. Locate the SATA setting menu item and ensure the motherboard SATA ports are enable.

D. To save new setting and exit the BIOS/COMS setup menu, choose the Save and Exit option.

E. Reboot the system or device allowing the changes to take effect.

F. If you're going to install an OS onto the SSD, please first delete the original partition before repartitioning the SSD during installation of the OS.

G. If you intend to install any backup tool with your SSD, please format the drive prior to installation .

DATO SSD installation guide_Notebook

Step 1:
Before the installation commences, be sure to shut down your notebook and disconnect the power cord and remove the battery.

Step 2:
Locate the hard drive bay on your notebook and remove screws and slide the drive out of the notebook.

Step3:
Remove bracket from drive and set aside.

Step 4:
Attach drive bracket to the new SSD. Slide the drive into the bay until fully seated (Make sure to align the SATA plug and SSD connectors.)

Step 5:
Replace screws to secure the drive.

Step 6:
Reconnect the power cord or battery. Switch on the computer system for the installation verification.

Step 7:
Configure the BIOS and partition the drive.
